

HYDROSMART

Centre-Pivot Success

2022-2023

SOUTH AUSTRALIA – SE

Stuart Adlington -Keith

“The cattle are in better condition since installing the Hydrosmart... and their coats are noticeably shinier than before. Pre-Hydrosmart we’d expect 2 cuts of Lucerne in the season, maybe 3. At this point (Feb-2023) we’re on our 4th cut and it’s our thickest yield yet.”

Naracoorte

David Prosser -Marcollat

“I was thinking of decommissioning a pivot last year because the water was causing issues with the pivot and crop yield. Now that’s not on my mind. The results have been incredible”

Michael McCabe -Tintinara

“My Lucerne’s looking better than it ever has and I think I’m using less water now. Where there previously were salt rings there are now none.. I’m wrapped.”
