Subject: Feedback on recent purchase on hard mains water used in Toowoomba Qld

Hello Paul

Would like to express my satisfaction with the performance of my recently installed Hydrosmart water filtering system...

Having only been up and running a couple of months I can see the immediate results in the quality of our town water . it is now drinkable , bathroom showers and basins are crystal clear .

No more tedious cleaning , little soap and detergent required due to the softness of the water . Looking at garden results will take longer , I expect there will be no more build up of salty scum in pot plant trays , no more scum in glass and tile bird baths .

It will be interesting to see how the garden plants respond to the soft waterThe simplicity of the unit makes it incredibly easy to install with little to no maintenance

regards Barb Webster

Brian if you receive this kindly pass on to Paul , having trouble getting the email correct !!!!!
