

Hydrosmart Testimonial 2015 - Calcium - Dates, Citrus, Fruit 3000 litres/day - Ross River Resort

Hi Paul, I am continuing to see improvements in the water here and on reading the testimonials you attached I would agree with them all.

We are purging and seeing a lot of break down in the lines which is causing some issues at present but I only see this as a temporary problem to be honest. We are definitely working towards a better situation and with the watering of grass etc there is a definite improvement.

I will be putting together my evidence to get the second Hydrosmart !

Kind regards

- Jodie
